PRIYA MENON

Machine Learning Engineer | Deep Learning | Model Deployment

@ priyamenon@recruiting.check India

PROFILE

Machine Learning Engineer with strong expertise in building scalable deep learning models, MLOps pipelines, and production-grade AI systems. Focused on computer vision, NLP, and recommendation engines with emphasis on model efficiency and real-time inference.

EXPERIENCE

Machine Learning Engineer

TechNova AI

2023 – Present

- Built and deployed deep learning models serving 2 million daily users with 98.5% uptime and sub-50ms latency.
- Developed computer vision pipelines achieving 94% accuracy in object detection for industrial quality control.
- Designed MLOps pipelines using Kubeflow and MLflow that reduced model deployment time from 3 weeks to 2 days.
- Optimized models with quantization and pruning, reducing inference cost by 62%.

ML Research Intern

IISc Bangalore

2022 – 2023

- Created NLP models for sentiment analysis that outperformed baselines by 18%.
- Collaborated on large-scale training infrastructure using distributed GPUs.

PROJECTS

- **Real-Time Recommendation Engine**: Personalized system deployed on Kubernetes serving 500k requests per hour.
- **Defect Detection CNN**: Computer vision model for manufacturing lines with 96% precision.
- **Efficient LLM Fine-Tuning Framework**: Reduced fine-tuning cost by 70% using LoRA techniques.

SKILLS

Python | PyTorch | TensorFlow | MLOps | Kubernetes | Deep Learning | Model Optimization | Computer Vision | NLP | MLflow | Docker | Quantization | LoRA / QLoRA

CORE STRENGTHS

- Scalable Model Deployment
- Production Inference
- Performance Optimization
- Data-Driven Decisions
